## Welcome to the Ghost Github wiki!

The wiki contains all kinds of documentation about the development of Ghost, and is also the place where you'll find early documentation for working with the various APIs. These documents are usually aimed at the people developing features, so they're rough around the edges, but they're here nonetheless.

Here's a quick list of the most useful pages:

A screenshot of the GitHub desktop application interface. At the top, there are standard window controls (minimize, maximize, close), a pull request icon, and a status bar showing 'Azeril/azeril.github.io'. Below the header, there's a toolbar with icons for adding a repository, switching branches, and viewing history. The main area is titled 'Compare' and shows a timeline of commits for the 'master' branch. A dropdown menu is open over the 'azeril.github.io' repository entry, which is highlighted with a blue background. The menu lists several repositories under 'GitHub' and one under 'Other'. On the right side of the screen, a large message box displays '0 Changes' with a sub-instruction: 'ProTip! Select a commit above to view its changes'. V. 作业....

# 作业布告：

1. Fork OMOOCHacker 仓库；
2. 将该仓库下 1sGit 文件夹里的 4 个 Version.doc 命名的文件依照修改的先后顺序合并为一个文件。  
提示：其实这 4 个文件是同一个文件先后修改后保存的 4 个版本，1.0 最早，2.1 是最终版本）；
3. 提交更改（依然是放在 1sGit 文件夹中）；
4. 1sGit 文件夹里其它文件请勿删除...不过可以将课程笔记记录其中（Git.md GitHub.md 文件）；
